OUR MISSION CONTINUES

**2010 REPORT TO THE
COMMUNITY**

St. Elizabeth's Hospital

An Affiliate of Hospital Sisters Health System

Our mission continues

*Dedication. Compassion. Commitment.
Strength. Respect. Care. Competence. Joy.*

Our world in 2010 would be unrecognizable to the three nuns who traveled from Muenster, Germany to Belleville in 1875 to minister to the members of this community. Their selfless mission to care for the sick and those in need has inspired all who have served at St. Elizabeth's Hospital for 135 years.

Environmental Services

Last year we adopted the theme, “Every Hand Healing,” to describe the commitment to health care excellence embodied in each and every one of our more than 1,500 employees. Inspired by the dedication and compassion of our founders and by the ongoing efforts of the Hospital Sisters Health System, we have made this simple phrase our pledge for health care excellence.

In the following pages you’ll read about advancements in medical technology, strengthening of physician services, mentoring programs for our nursing staff and other aspects that guide us. Our goal is to provide ever-improving care to the residents of southern Illinois. Truly, only by embracing the concept of selfless devotion to our patients and visitors can we make the best use of advancing technologies and tap into the enthusiasm and idealism of professional and compassionate caregivers.

Our mission continues,
following in the steps of our
brave and inspirational founders.

"We strive to utilize every aspect of the health care system to improve the lives of our patients and visitors, to continue our mission to serve."

Larry Schumacher

Interim President and CEO, Chief Operating Officer
Hospital Sisters Health System

Health care certainly has been on the front burner of the political scene in the past year. Emotions have run high regarding who should be covered, what the costs should be and where the funding will be found.

While the debates rage around the country, the Hospital Sisters Health System and our colleagues quietly and selflessly go about their business of serving the people of Illinois and Wisconsin. I marvel at the continued dedication of our many passionate physicians, nurses, staff and administrative people who, day in and day out, vigilantly adhere to the precepts of our founders, who lived solely to make the lives of those less fortunate in their midst as bright as possible.

Despite these turbulent times, or perhaps even because of them, we strive to utilize every aspect of the health care system to improve the lives of our patients and visitors, to continue our mission to serve. We call it "Care Integration," a strategy specifically designed to bring together the diverse talents of our many dedicated physicians, nurses and clinicians to offer our patients the finest in health care.

Our physicians are in the vanguard of medical innovators, blending their expertise with their compassionate personal care. Our nurses diligently ensure that they bring utmost professionalism as well as tender care to each patient, while our technicians tap into the vast potential of ever-improving health care through advanced technology and devices designed to improve our efforts.

While health care moves forward every day, we believe that the best and most tender service combines advancing technology with the spirituality and inspiration of Franciscan values. Throughout the 13 health care facilities and our 100 clinics in our system, we are motivated by our guiding principles of the Franciscan healing ministry, our Catholic identity, our commitment to each of the communities we serve, including southern Illinois, and our stewardship of this mission.

Our world grows more complex every day, even as methods to improve it grow more diverse. What remains constant, however, is the burning light of compassion and love that remains eternal in the caring philosophy of the Hospital Sisters of St. Francis, the light that shines throughout the Hospital Sisters Health System.

Larry Schumacher
Interim President and CEO, Chief Operating Officer

Sharon D. Timmons

Interim President and Chief Executive Officer
St. Elizabeth's Hospital

When I began my career as a nurse's aide, I realized nursing would always be my passion. During my career, I have worked in health care facilities in Tennessee, Illinois, Colorado and Iowa and have had the pleasure of working with many talented and dedicated individuals who have devoted their lives to providing quality care to their patients.

When first introduced to the Hospital Sisters Health System, I was struck by the organization's commitment to bring the finest health care to its patients. From the dedication of caring physicians to the most advanced medical procedures, from the compassion of nurses to the consistent performance of all hospital employees, I saw first-hand the philosophy of Saint Francis of Assisi in action.

As the Interim President and CEO of St. Elizabeth's Hospital, I am committed to moving the hospital forward. We are blessed to have a resourceful and energetic staff who share an ongoing passion for excellence and a commitment to continued growth and service.

With the assistance of eight 90-Day Action Plan Teams, we establish quarterly priorities to keep us focused on our goals and develop action plans to achieve those goals. We focus every day on improving patient satisfaction and are constantly refining our processes to recruit and retain caring, competent staff. We work to ensure our managers have the tools they need to make informed decisions on a daily basis while monitoring improved business processes to ensure efficient practices are in place.

Every day I teach, coach, mentor and learn from amazing people who believe in our mission to provide quality care throughout our facility and in the community. Our "Every Hand Healing" philosophy is evident in the hands that prepare meals, check beds and provide care to our patients every day and night. It takes all of these hands to provide the best quality care to our patients.

Sharon Timmons
Interim President and CEO

"We are blessed to have a resourceful and energetic staff who share an ongoing passion for excellence and a commitment to continued growth and service."

We believe in our mission

"The Care Integration program has allowed St. Elizabeth's Hospital to continue our mission of serving the community by providing our physicians with opportunities for full alignment with the hospital's mission and to continue to provide excellent patient care."

– Dr. Salil Gupta, Chief Medical Officer

"Today, as from the beginning of our Franciscan ministry, we are here to heal and to care. Our patients are God's gift to us. May we always cherish this gift."

– Alice Chatley, Chief Nursing Officer

"For me, Every Hand Healing symbolizes the spirit of collaboration among all who have taken on the difficult task of responding to God's call to serve in this ministry. Every person who is truly committed to our mission, regardless of their role, has the privilege of making a difference in someone else's life on a daily basis."

– Bob Miller, Chief Operating Officer

"With all of the change that occurs in the dynamic industry in which we operate, there is one thing that stands solid... the mission of our healing ministry."

– Leslie Eckert, Chief Financial Officer

"I continue to appreciate our heritage and am impressed with the importance of our obligation to provide high quality care, delivered in the unselfish manner which was demonstrated by the Sisters who founded us. We all have a great responsibility to continue this important mission."

– Edward Jacquin, Assistant Administrator Support Services

every hand
healing
 THROUGH OUR FAITH

After 60 years, their mission continues

In 1875, three intrepid adventurers from Germany arrived in Belleville with the expressed mission of serving settlers on the Great Frontier in America. They were Hospital Sisters of Saint Francis, and their efforts began a commitment of health care service and duty to the people of southern Illinois that continues to this day at St. Elizabeth's Hospital.

The Hospital Sisters dedicated their lives to the care and concern of others. It's a selfless devotion epitomized by three modern sisters who have lived their mission of "Every Hand Healing." We honor these "Diamond Jubilarians" for their inspiring records of quiet and humble accomplishment:

Sister Anna Marie Schwieder, OSF currently volunteers at SWIC Programs and Services for Older Persons (PSOP). Previously she was Director of Pastoral Care at St. Elizabeth's and continued to work in that program part-time until 1999. She also has volunteered at Our Lady of the Snows.

Sister Helene Schneider, OSF also has volunteered at PSOP for the past eight years. Prior to that effort, Sister Helene served as Chaplain in Pastoral Care at St. Joseph's Hospital in Highland as well as working in Pastoral Care at St. Elizabeth's until joining Our Lady of the Snows as a volunteer in 1999.

Sister Thomas Kundmueller, OSF has served on the nursing staff at Bethany Place in Belleville since 1989 and also spent 10 years of her 58-year career in nursing at St. Elizabeth's. Like Sister Anna Marie and Sister Helene, she is celebrating her 60-year jubilee in 2010.

The ongoing dedication of these three women underscores charity and compassion exemplified on a daily basis by the Hospital Sisters of Saint Francis. Their work inspires each of us to give of ourselves willingly to make each patient's experience at our hospital as beneficial as possible.

Sister Helene Schneider, OSF, Sister Thomas Kundmueller, OSF, and Sister Anna Marie Schwieder, OSF

THROUGH OUR PHYSICIAN COLLABORATIONS

Together, serving our patients

St. Elizabeth's Hospital is fortunate to have excellent physicians to lead our dedicated staff in serving our patients throughout southern Illinois. We are indebted to each and every physician who brings his or her dedication to our health care service.

Dr. Terence Wade, President of our Medical Staff and a Board-certified surgeon at Lincoln Surgical, is past president of the St. Louis Surgical Society and author of dozens of articles, books and studies on cancer. He epitomizes the dedication of our physicians across all disciplines. A staff member since 1998, Dr. Wade consistently earns his patients' respect by delivering competent and compassionate care while inspiring others to do the same.

Since founding our Hospitalist program, Dr. Shelly Harkins and her colleagues provide health care for hospitalized patients, seeing

those referred by primary care doctors, emergency room doctors or other physicians here. She is also a leader in the HSHS Medical Group as Medical Director and serves on the Physician Advisory Committee for Meditech implementation.

Dr. Michael Nash recently joined the Hospitalist program after completing his family medicine residency here. St. Elizabeth's hosts Saint Louis University School of Medicine's Family Residency. Many of the civilian and military graduates continue their careers at our facility, as did Dr. Nash, continuing our process of providing integrated care for our patients with highly-trained and committed professionals.

Several of our physicians have brought expertise to St. Elizabeth's from nearby Scott Air Force Base, where they served as military officers. Our Chief Medical Officer, Dr. Salil

Terence Wade, MD
Lincoln Surgical Ltd.

Shelly Harkins, MD
Hospitalist Services

Michael Nash, MD
Hospitalist Services

Gupta, who single-handedly developed a Level II+ nursery from scratch at the air base, subsequently relied on that experience when he developed our Level II+ neonatal intensive care unit.

“Helping families welcome infants into the world is immensely rewarding,” said Dr. Gupta. “The core values instilled in everyone at St. Elizabeth’s shine through every day and night when we cater to the needs of our newborns and their mothers. This is how every hand heals at St. Elizabeth’s.”

We continue to bring excellent practitioners and specialty services to southern Illinois. Dr. Edward Schuessler has practiced anesthesiology in Missouri, Illinois and Kentucky, both on medical staffs and through his own private anesthesiology services, and has provided consulting services in at least 30 states. In November 2009, he joined St. Elizabeth’s as Director of Perioperative Services and quickly established a team of qualified anesthesiologists and CRNAs to

provide this critical service for surgical teams and their patients.

Dr. Joseph Shumway has greatly enhanced our ability to serve patients during high-risk pregnancies. As a specialist in maternal-fetal medicine, obstetrics and gynecology and high-risk obstetrics, he created our new High-Risk Perinatal Services. He has held positions with the World Health Organization and completed his fellowship at Johns Hopkins Medical School.

Expanding our Hospitalist program, our perinatal division, family medicine, anesthesiology and other areas all contribute to the holistic approach to integrated care that underscores the philosophy of devotion and compassion at St. Elizabeth’s. Our goal is to bring our patients the best medical care from their arrival here until their departure. We search for the best health care practitioners to add to our staff, and work diligently to provide them with ongoing technologies to further enhance their services.

THROUGH OUR TECHNOLOGY

Meditech, our future for patient care

St. Elizabeth's Hospital has served the residents of southern Illinois since our founding by the Hospital Sisters of Saint Francis in 1875. In those 135 years, our focus on optimal patient care has remained foremost in our core philosophy. We reinforce that value with our mission to have "Every Hand Healing" throughout each aspect of our devotion to health care.

While the goal remains the same, through the years, the "tools" of our care have changed dramatically. Advances in technology have enabled us to help patients and visitors today in ways not dreamed possible in the past.

In October 2010, St. Elizabeth's Hospital will begin instituting our newest technological element when Meditech is introduced to our physicians, clinicians, volunteers, patients and visitors.

Quicker, more efficient and more streamlined access to medical records for our physicians and staff.

Dr. Joseph Yazdi, of Southern Illinois Brain and Spine Center, took part in one-on-one Meditech training session led by Erica Gentry, HSHS Division (Southern Illinois) Project Coordinator.

At St. Elizabeth's Hospital and throughout the HSHS Division (Southern Illinois), Meditech systems will enable us to achieve significant clinical, operational and financial improvement through process redesign and standardization. This means quicker, more efficient and more streamlined access to medical records for our physicians and staff, which in turn means improved service for our patients.

All physicians in the southern Illinois division have been trained in the Meditech system. Meditech enables our physicians to

quickly access patient rounding lists and to obtain graphic displays of lab results, vital signs and other data. It allows them to view special panels that display correlated and longitudinal patient material, as well as bringing nursing documentation (allergies, vitals, weight, etc.) online.

Meditech enables easier access to information about hospital visits as well as visits to other health care locations in the HSHS system. Order entries for pharmacy medications are included in the software as well as bar-coded medication administration details and other aspects of patient reports, such as medication summaries, rush lab information, etc.

We firmly believe that the addition of Meditech to our system will further enhance our

effort to have each of our employees dedicated to our goal of “Every Hand Healing.”

One of our collaborating physicians, Dr. Linda Camp of

New Dimensions Cosmetic and Reconstructive Surgery, is a Physician Champion for the new system and encourages her colleagues to embrace the patient care and time-saving options Meditech offers.

“The benefits of using this electronic record system to the patients are many,” notes Dr. Camp. “First, their information is readily available to the physicians and medical team so the course of treatment can begin sooner. An accurate medication list is

Workstation on Wheels (WOW)

The Howard Cart will primarily be utilized on inpatient units by the nursing staff and features a wireless laptop to accomplish bedside documentation; individualized patient medication drawers; a bar code scanner for completion of Bedside Medication Verification (BMV); and general storage drawers for storage of commonly needed items.

shown so there is less need to rely on family members to remember the prescription names, especially when emergent care is needed.” She also notes that physicians will be equipped with the knowledge of what has been done prior to the evaluation so as not to duplicate the work-up.

That’s the service we expect to bring to all of our patients as we integrate Meditech into our HSHS system. It’s our version of the best in personal care personified by the Hospital Sisters of Saint Francis.

Other improved systems and new procedures that have benefited our patients:

Transradial Access Procedure Within the past year, the Cardiac Cath Lab, under the direction of Dr. Anil Shah, began utilizing this new procedural technique. Though a challenging procedure, the benefits of transradial access include less pain and bruising for patients, and a quicker recovery time. Widely performed in other countries, only 1% of cath procedures are done transradially in the U.S. Dr. Shah and his partners have used this beneficial technique on over 200 patients with great success and no complications. Access through the wrist, as opposed to the thigh, also lessens concerns for vascular complications and has added positively to patient satisfaction.

Stereotactic Breast Biopsy Stereotactic biopsy is used to take samples from an area that cannot be felt during a breast exam but was seen on a mammogram. During the procedure, a physician guides a small probe into the breast through a quarter-inch incision and gently collects suspicious tissue samples for evaluation. Completed in approximately an hour, the procedure results in highly accurate breast diagnosis with minimal pain, scarring and recovery time for patients.

Pneumatic Tube System Averaging 10,000 transactions per month house-wide, the new pneumatic tube system has improved speed of service for every floor of the hospital along with reducing costs. Since the \$600,000 upgrade was completed in April 2010, specimen delivery time for STATs collected in the Emergency Department has decreased by 30% and turnaround time for delivery of STAT medications has been cut by over 50%.

every hand *healing* THROUGH OUR PEOPLE

RN Residents... Our mission in practice

“Every Hand Healing” serves the needs of our staff as well as our patients. Our colleagues work toward the highest level of commitment and care. With that in mind, the Versant RN Residency program serves a vital role in nurturing our new nurses with guidance and support.

The 18-week transition course is thorough, comprehensive, and welcoming to new nurses. Residents learn to acclimate to their role in an organized, systematic, and confident manner. Since the start of the program in 2006, more than 100 RNs have completed the program, according to Director of Clinical Education and RN Residency Coordinator, Donna Meyers, RN, MSN.

“The Residency has been a benefit to all our nurses,” says Meyers. “It has fueled the camaraderie between veterans and incoming nurses. In addition, an exchange of knowledge and experience enhances the care for our patients. The program demonstrates our institution-wide commitment to caring and professionalism. It extends beyond the patient experience and affects

Donna Meyers, RN, MSN, Director of Clinical Education, (right) works closely with nursing residents including RN Residency 2009 graduate Ashley Lawrence, RN (left) and current RN Resident Sara Shoulders (middle).

our staff as well.”

The Versant RN Residency program is customized to provide the newly graduated nurse with the right information, at the right time and in the right sequence. Plus, a network of senior nurses provide a comprehensive support structure as mentors, preceptors, and confidants.

Residents log more than 540 hours of 1-to-1 preceptor time with experienced, unit-based RNs who provide challenging patient care experience, teach technical skills, share clinical knowledge and help residents develop decision-making skills. Residents also benefit from more

than 180 hours of classroom and lab education.

The benefits of the RN Residency program are numerous and impact everyone at St. Elizabeth’s, including physicians, administrators, staff and, most importantly, patients. Confident and competent nurses bring their caring professionalism to all clinical areas. They highly value the nurse-patient relationship and a make positive impact on the patient’s hospital experience. Organized and supported in their vocation, these nurses exemplify our mission of “Every Hand Healing.”

THROUGH OUR CARE INTEGRATION

While the mission of the Hospital Sisters Health System (HSHS) has remained steadfast and focused since its inception, the dynamics of health care have changed substantially through the decades.

Reflecting that reality and embracing contemporary options in health care, HSHS works seamlessly with a wide variety of health care practitioners, both within and beyond the physical parameters of the 13 hospitals and health care facilities in our system, to provide what we call “Care Integration.”

Care Integration includes partnerships with primary care groups, multi-specialty groups, single specialty groups and independent physicians throughout our service area who offer medical services from primary care to sub-specialty care, and also encompasses our RN Residency.

Technology also plays an important role. We’re bringing our physicians, clinicians, administrators and other staff into an electronic world that not only delivers medical information quickly but makes the entire patient experience more efficient than in our paper-reliant past.

Through Care Integration we adhere to the strong moral foundation of our predecessors, a foundation of enduring principles that guide us: A ministry of the Catholic Church dedicated to service for the sick and those in need; attending to all of the needs of the individual in the spirit of Francis of Assisi; committed to serving the health care needs of our community; and being faithful stewards of the ministry entrusted to us. Every day and every hour at St. Elizabeth’s Hospital, our motto of “Every Hand Healing” adheres to those fundamentals.

“We must remember the importance of clearly communicating with the patient and their family to allay their anxieties. Those efforts may be integral in the healing process.”
