

WELCOME TO A NEW ERA IN DIAGNOSTIC IMAGING.

St. Elizabeth's has made getting an X-ray, CT scan, mammogram, or other diagnostic imaging easier – and better! Now you can have your digital imaging needs taken care of at any one of our three convenient locations – our main hospital in Belleville, our O'Fallon Medical Building or our Monroe County Medical Building. Thanks

to our new Picture Archival Communication System (PACS), we now store images from all three locations in a single database, which your doctor can access as needed. Convenient locations. Sharper details. Faster results. They're all good reasons to rely on St. Elizabeth's for all your digital imaging needs.
